As a Front-End Developer with over 2 years of hands-on experience, I specialize in building dynamic web applications using React.js and Next.js. I am skilled at creating responsive, user-friendly interfaces that improve the overall user experience and am dedicated to delivering high-quality solutions that support business growth.

Professional Experience

Hornbook Technologies PVT.LTD
Front End Developer

02/23 - present

Education

Gujarat Technological University - BTech IT

Technical Skills

- **HTML and CSS:** Proficient in creating responsive and accessible designs using HTML and CSS, with hands-on experience in CSS frameworks such as Bootstrap, Material UI, and Tailwind CSS.
- **React JS:** Skilled in building dynamic user interfaces and applications with React.js, including expertise in developing reusable components and managing state efficiently using Redux and context API.
- **Next JS:** Experienced in utilizing Next.js for server-side rendering, static site generation, and optimizing React applications for performance.
- **JavaScript and TypeScript:** Proficient in JavaScript and familiar with ES6+ syntax, DOM manipulation, and TypeScript for type-safe development.
- **Node.js and MongoDB:** Familiarity with Node.js for server-side development and MongoDB for database management in MERN stack applications.
- **Git and Bitbucket:** Familiar with Git version control system, knowledge of Git workflows and branching strategies.
- **Testing:** Experience in unit testing and integration testing using tools like Jest and Enzyme.
- **Agile Methodologies:** Experience in working with Agile methodologies like Scrum.

Skills

- Identifying issue and debugging code to approach problems analytically
- Problem-solving and Adaptability
- Team work

Roles and Responsibilities in projects

- Provided regular updates on project progress and collaborated with team members to achieve project Milestones.
- Coding and design integration
- Unit testing and bug fixing

Experience Summary

- 2+ years of experience in web development, with a focus on React.js and Next.js.
- Proficient in frontend technologies including HTML, CSS, JavaScript (ES6+), React.js and Next.js.
- Unit testing and bug fixing
- Implemented responsive design techniques to optimize websites for various devices and screen sizes.
- Utilized version control systems like Git and project management tools such as Jira for efficient collaboration and tracking of tasks.

Projects

- **NurseIO**

Contributed to the development of a nurse placement platform that connects hospitals with nurses based on their needs, time availability, and hourly rates. Managed client communication to ensure seamless project execution and user satisfaction. The platform was built using NextJS to deliver a responsive and dynamic user experience.

Technologies used: NextJS, Redux, Jira, HTML5/CSS3, JavaScript, Git, SourceTree, MUI.

- **Speed Scan Report System**

Developed an internal report generation system focused on security-related project management. The system integrates both frontend and backend technologies to generate real-time reports based on project risk management data.

Technologies used: ReactJS, HTML5/CSS3, JavaScript, Git, Node.js, MongoDB, Bitbucket.

- **NatWest Bank**

Contributed to the development of an internal application for NatWest Bank, utilizing micro frontend architecture to modernize the bank's legacy system into an intuitive user interface. Developed using the bank's own SDK library to ensure seamless integration and maintain system consistency.

Technologies used: ReactJS, Git lab, React testing library, custom SDK.
